

PORCHES AND RAILINGS

Porches & Railings

Create a welcoming outdoor space, from a covered entry to a porch that gives you room to sit and enjoy the view.

The Kentuckian

A full-length porch that stretches across the front of the building, with room for seating and gathering.

The Leatherwood

A partial porch that covers one section of the front, creating a defined outdoor sitting area.

Standard Gable Porch

A classic covered entry beneath a gable roof. Ask about cedar or treated posts.

Corner Porch

A porch that turns the corner, adding a natural place to sit and enjoy the outdoors.

Rustic Gable Porch

Wood-forward details add a warm, rustic look to the front of your building.

RAMPS AND ACCESS

Ramps & Access

Choose practical access features that fit your building, equipment, and site.

Ramp

A convenient way to move wheeled equipment in and out of your building.

Loft Ladder

Provides access to loft space for seasonal items, supplies, and gear.

Framed Openings

Plan door and access openings around how you intend to use the space.

Site Access Review

Review the approach, ground slope, and available clearance before delivery.

INTERIOR OPTIONS

Inside the Building

Plan an interior that helps keep projects, tools, and supplies organized.

Workshop Setup

Add a workbench and shelving to give tools and supplies a dedicated place.

Overhead Storage

Use loft space with ladder access to store seasonal items and equipment.

Organized Interior

Combine shelving and a divider wall to create separate areas inside.

Tack Room Setup

Create a dedicated area to keep riding equipment and supplies together.

Custom Layout

Explore combinations of lofts, divider walls, workbenches, and shelving.

Plan Around Your Needs

Talk with your local team about a layout that suits your building and intended use.
